PRD : E-Commerce Management Platform

Executive Summary

The LinkZen E-Commerce Management Software is a comprehensive, cloud-based, "all-in-one" platform designed to help Indian businesses (Online Retailers, D2C Brands, Marketplaces, Wholesalers, and Dropshippers) launch, manage, and scale their online operations. The platform is GST-compliant, secure, and performance-oriented.

2.1 Product & Inventory Operations

- Product Management (01): Full lifecycle management including addition/editing, multi-category assignment, variant management (size, color, etc.), bulk uploads, and custom attributes.
- Category & Brand Management (02): Organizational tools including category hierarchy, brand management, collection structuring, banner/slider management, and featured category highlighting.
- Inventory Management (03): Real-time tracking, low-stock alerts, stock adjustments, support for multiple warehouse locations, and bulk import/export capabilities.

2.2 Order & Customer Lifecycle

- Order Management (04): End-to-end processing: order tracking, status management, automated invoice generation, packing slips, and historical order logging.
- Customer Management (05): Centralized CRM features: customer registration, profile management, address books, customer grouping, and detailed order history.
- Return & Refund Management (16): Automated workflows for return requests, approvals, refund routing (wallet or original payment method), reason analysis, and detailed return reporting.

2.3 Financials & Transactions

- Payment Gateways (06): Integration with leading providers (Razorpay, PayU, CCAvenue) supporting UPI, Net Banking, Cards, COD, payment verification, and refund processing.
- Tax & GST Management (08): India-specific compliance: GST invoice generation, automatic tax calculation, HSN/SAC management, IGST/CGST/SGST splitting, and dedicated GST reports.
- Wallet & Loyalty Points (19): Customer retention tools including user wallets, loyalty point programs, point-to-purchase conversion, redemption logic, and transaction history.

2.4 Logistics & Marketing

- Shipping & Delivery (07): Logistics management including shipping method setup, rate calculation, courier integration, AWB generation, real-time tracking, and delivery oversight.
- Discounts & Coupons (09): Promotional engine: custom discount rules, coupon code generation, "Buy X Get Y" promotions, cart rules, and bulk discount handling.
- Email & SMS Marketing (14): Automated communication: email/SMS campaigns, order notifications, abandoned cart email triggers, and newsletter management.
- Affiliate & Referral (18): Growth engine including affiliate/referral registration, link tracking, commission rule configuration, and performance analytics.

2.5 Discovery & Engagement

- Product Search & Filters (10): Enhanced search functionality with auto-suggestions, advanced filters (price, brand), search analytics, and recent search tracking.
- Wishlist & Compare (11): Customer experience tools: adding/sharing wishlists, product comparison, move-to-cart functionality, and wishlist notifications.
- Review & Ratings (17): Social proof module: product reviews, customer ratings, review moderation, Q&A sections, and review analytics.
- Social Media Integration (20): Cross-channel connectivity: social login, social sharing, Instagram shop integration, Facebook Pixel integration, and social feed display.

2.6 Management & Infrastructure

- Multiple Store Management (12): Capabilities for managing multiple stores from one dashboard with separate themes, inventories, and specific reports.
- Content Management (13): CMS for pages, blog/FAQ management, menu structures, and SEO-friendly URL configurations.
- Reports & Analytics (15): Data-driven insights: sales reports, product/customer/inventory performance tracking, and high-level business analytics.
- Mobile App Integration (21): Mobile strategy: Android/iOS app support, real-time synchronization, push notifications, app customization, and mobile-specific analytics.
- SEO & Marketing Tools (22): Visibility tools: SEO-friendly structure, meta tag management, Google Sitemap generation, redirection management, and marketing analytics.
- Abandoned Cart Management (23): Revenue recovery: tracking, automated recovery emails/SMS, and conversion performance reporting.
- Security & Access Control (24): Enterprise-grade security: role-based access, admin logs, Two-Factor Authentication (2FA), data encryption, and automated secure backups.
- Support & Ticketing (25): Operational support: customer support ticketing, live chat integration, knowledge base construction, support automation, and SLA management.

Non-Functional Requirements

- **Accessibility:** Cloud-based architecture, accessible anywhere.
- **Compliance:** Fully GST compliant, RBI guideline compliant, PCI DSS compliant.
- **Performance:** High-performance, scalable, and stable infrastructure.
- **Maintenance:** Regular software updates and 24/7 support.
