PRD : Pharmacy Billing & Management Software

Product Overview

A comprehensive, cloud-based, and GST-compliant management solution designed specifically for retail pharmacies, medical stores, clinics, hospitals, and pharmacy chains in India. The software aims to streamline operations, ensure regulatory compliance (DPCO 2013), and enhance business growth through automation and real-time data insights.

Functional Requirements (Core Services)

A. Operational Management

- 01. POS Billing: Fast billing, barcode scanning support, handling multiple invoice types, and bill hold/recall functionality.
- 02. Stock Management: Real-time updates, tracking of batches, expiry dates, and MRP, low stock/expiry alerts, and stock adjustments.
- 04. Purchase Management: Automated purchase orders, supplier bill processing, returns management, purchase history, and rate/discount management.
- 05. Sales & Return: Dedicated sales return handling, credit sales management, customer-wise sales tracking, and return/replace workflows.
- 10. Payments & Accounts: Multi-mode payment support (Cash/Card/UPI/Wallet), credit/due management, and comprehensive day book.

B. Database & Compliance

- 03. Medicine Database: Comprehensive medicine list, brand-to-generic mapping, HSN code & tax details, and therapeutic classification.
- 09. GST & Tax Management: Automated GST invoice generation, tax calculations, HSN code support, and GSTR report generation.
- 12. Schedule H & Controlled Drugs: Compliance with Schedule H regulations, restricted sale tracking, specific registers/reports, and expiry/stock control.

C. Customer & Supplier Relations

- 06. Customer Management: Profiles, purchase history, loyalty point/discount tracking, and outstanding credit limits.
- 07. Supplier Management: Supplier profiles, payment terms, purchase history, and supplier performance tracking.
- 11. Prescription Management: Digital prescription storage, prescription history, doctor-wise sales reports, and attachment capabilities.
- 24. Loyalty & Rewards: Loyalty point accumulation, rewards on purchase, customer-specific reward programs, and promotional codes.

D. Intelligence & Reporting

- 08. Expiry Alerts: Proactive expiry alerts, near-expiry reports, short-expiry stock tracking, and automated email/SMS notifications.
- 15. Reports & Analytics: Detailed sales, stock, expiry, and purchase reports for data-driven decision-making.

E. Advanced Features

- 14. Barcode & Label Printing: Integrated printing for barcodes, shelf/product labels, MRP labels, and custom templates.
- 16. Multi-Store Management: Centralized dashboard to manage multiple locations, stock transfers, and branch-wise reports.
- 17. Manufacturer Management: Manufacturer/Company-wise reporting, scheme tracking, and product mapping.
- 18. SMS & Email Notifications: Automated alerts for bills, expiry, payment reminders, and marketing schemes.
- 21. Home Delivery Management: Order tracking, delivery boy management, and delivery charge calculation.
- 22. E-Commerce Integration: Syncing for online orders, inventory, and marketplace support.
- 23. Accounting Integration: Tally/Busy integration, auto-journal entries, ledger management, and profit/loss statements.
- 25. Mobile App Access: On-the-go business management, stock/sales view, order approval, and mobile dashboard.

Non-Functional Requirements

- Data Security: Secure cloud storage with automatic backups, data encryption, and anytime restore.
- User Access: Role-based access control (RBAC), multi-user support, activity logs, and granular data permissions.
- Compliance: 100% compliant with Indian regulations (GST and DPCO 2013).
- Support: Dedicated support infrastructure across India.

Technical Specifications Summary

- **Deployment: Cloud-Based.**
- **Accessibility: Cross-platform (Desktop/Mobile).**
- **Scalability: Supports single retail outlets to large chain store networks.**
