

LINKZEN TECHNOLOGY

AND RESEARCH CENTRE

PRD : Restaurant Management Software

Product Overview :

LinkZen is an all-in-one restaurant management platform designed to streamline operations, enhance customer experience, and increase profitability for restaurants, cafes, cloud kitchens, and food chains in India. The system is cloud-based, GST-compliant, and accessible from anywhere.

2. Core Functional Modules

Operational Modules :

- 01. Point of Sale (POS) Billing: Facilitates fast billing, supports multiple invoice types, bill splitting/merging, and KOT/bill reprinting.
- 02. Menu Management: Enables unlimited menus, item variants, modifiers, combo/set menus, and item-wise pricing.
- 03. Table Management: Features table layout/mapping, status tracking (Free/Busy), table transfers, and reservation management.
- 04. Kitchen Management: Includes KOT management, Kitchen Display System (KDS), preparation time/status tracking, and kitchen performance analysis.
- 05. Order Management: Manages dine-in, takeaway, and delivery orders with integrated tracking, order history, and online integration.

Inventory & Supply Chain

- 06. Stock & Inventory: Provides real-time stock tracking, ingredient-level management, low stock/expiry alerts, and stock adjustments.
- 07. Purchase Management: Handles purchase orders, supplier management, Goods Received Note (GRN)/bill entry, and purchase analytics.
- 08. Recipe & BOM (Bill of Materials) Management: Supports recipe creation, BOM generation, cost-per-recipe calculations, and standardization of food preparation.

Staff & Customer Relations

- 09. Customer Management: Maintains a customer database, loyalty point tracking, birthday/anniversary recording, and comprehensive visit history.
- 10. Waiter/Staff Management: Includes staff registration, role-based permissions, staff-wise sales tracking, and attendance integration.
- 11. Online Order & Food Delivery: Enables self-owned online ordering, integration with platforms like Swiggy/Zomato, delivery boy management, and delivery zone configuration.

Financial & Analytical Modules

- 12. Payment Management: Supports multiple payment modes (Cash/Card/UPI/Wallet), tip management, and tracking of pending payments.
- 13. Discounts & Offers: Manages item-level or bill-level discounts, happy hour settings, combo offers, and coupon code management.
- 14. GST & Tax Management: Ensures GST compliance with automated tax calculation, HSN code support, GST invoices, and automated GST reporting.
- 15. Reports & Analytics: Provides comprehensive sales, item-wise, and profitability reports, along with an MIS (Management Information System) dashboard.
- 16. Expense Management: Tracks daily expenses, categorizes costs, and generates detailed expense reports.
- 20. Accounting Integration: Features Tally integration, automatic journal entries, day book maintenance, and P&L (Profit & Loss) tracking.

Multi-Outlet & Advanced Features

- 17. Multi-Outlet Management: Allows management of multiple outlets via a centralized dashboard, consolidated reporting, and stock/sales transfers between locations.
- 18. Reservation & Booking: Manages table reservations, advance bookings, walk-in management, and automated booking reminders.
- 19. Feedback & Ratings: Collects customer feedback, manages ratings, performs review analytics, and tracks service improvement data.
- 21. Loyalty & Rewards: Manages loyalty programs, points-on-purchase, point redemption, and membership plans.
- 22. Digital Menu & QR Ordering: Provides contactless, customer-self-ordering via QR codes to reduce wait times.
- 23. Notifications & Alerts: Real-time alerts for low stock, order readiness, reservations, and product expiry.

Infrastructure & Access

- 24. Cloud Backup & Data Security: Automatic cloud backups, data encryption, secure storage, and access control management.
- 25. Mobile App Access: Provides an owner-facing dashboard for real-time sales monitoring, approvals, and management from anywhere.

3. Business Objectives (Benefits)

- Improve Operational Efficiency: Streamlined workflows from kitchen to front-of-house.
- Increase Sales & Profitability: Data-driven decisions and optimized menus.
- Enhance Customer Experience: Reduced wait times and loyalty engagement.
- Reduce Food Cost & Wastage: Through accurate recipe management and inventory control.
- Real-time Insights: Instant visibility into business performance.

4. Technical Specifications

- Deployment: Cloud-based.
- Compliance: GST Compliant, RBI/NBFC Compliant.
- Target Environments: Fine Dining, Casual Dining, Cafes, Cloud Kitchens, QSR Chains, Bars/Lounges, Bakeries, Takeaways.
- Support: 24/7 Support.
