

WEBCRAFT ENGINE

Web Development

Linkzen's WebCraft Engine service delivers enterprise-grade web development — from blazing-fast corporate websites to complex custom web portals. Our engineering team combines cutting-edge frontend technology with robust backend architecture to build scalable digital products.

Service Offerings

01 Corporate Website Development

Professionally designed, SEO-optimized company websites with CMS integration, multi-language support, and analytics dashboards.

02 Custom Web Portal Development

Complex multi-role portals — client portals, vendor management systems, admin dashboards — built to exact specifications.

03 E-Commerce Platforms

Full-stack online stores with payment integration, inventory sync, and order management.

04 API Development & Integration

RESTful and GraphQL API design, third-party API integrations, and microservices architecture.

05 Progressive Web Apps (PWA)

Mobile-first, installable web applications with offline capabilities and push notifications.

06 UI/UX Design

Research-driven interface design with wireframing, prototyping, and user testing.

Technology Stack

01 Frontend

React.js, Next.js, Vue.js — modern frameworks with TypeScript for type-safe development.

02 Backend

Node.js, Python (Django/FastAPI), PHP (Laravel) based on project requirements.

03 Database

PostgreSQL, MongoDB, MySQL with Redis caching for high-performance applications.

04 DevOps

CI/CD pipelines, Docker containerization, AWS/Azure/GCP cloud deployment.

05 Performance

Google PageSpeed 90+ scores, Core Web Vitals optimized, CDN-accelerated delivery.

Development Process

01 Discovery & Planning

Requirements gathering, technical architecture design, and project roadmap creation.

02 Design Phase

Wireframes, UI mockups, and design system creation with client approval at each stage.

03 Development

Agile sprints with weekly demos, code reviews, and continuous testing.

04 Deployment & Support

3 months free post-launch support, 99.9% uptime SLA, and performance monitoring.

Our Commitment

01 SEO-First Approach

Every project built with technical SEO best practices from day one.

02 Mobile-First Design

Fully responsive across all devices — tested on 50+ screen sizes.

03 Ownership

Full source code ownership, no vendor lock-in. You own everything we build.
